Dear Leslie,

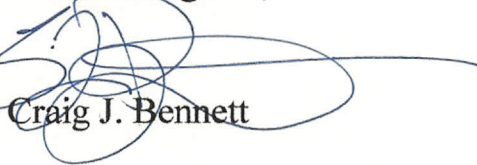

I wanted to take this opportunity to thank you for helping us find our perfect home and for all your assistance during the process.

Ed and I, as first time buyers were unsure of so many things and had so many questions and concerns; we really appreciate you guiding us through the process. Your advice and direction helped us not only secure the right home, but was also able to reassure us that we were making the right decisions. There were many times that you went far beyond the duties of a real estate agent, and thus making one of the biggest decisions of our lives a very positive one.

We knew from the moment that we met you at that random open house that you were going to be the agent for us. We found your very "non-salesperson" approach very refreshing.

We will be referring you to our friends and when we are in need of an agent again, your will be hearing from us.

Warmest regards,

Craig J. Bennett
